- How the internet works, computer software and Hardware.
- Values and types, loops, and conditions.

Frontend-Mobile -

- Basic knowledge of data types, Arrays, Lists, and Object-Oriented Programming(OOP) in Kotlin.

- Capable of creating layouts and recycler views in building mobile apps in Android Studio.

UX Research

- User experience and design thinking.
- User Research and why we do it.

UI/UX Design

- Elements and Principle of Design.
- Ideation, Prototyping, designing Logos, posters, and flyers.
- Use of Figma, Adobe Photoshop, and Adobe Illustrator.

Backend Development

- Basic knowledge of Linux, Arithmetic Operations, and Comparison Operations.
- Able to understand data types, List, Tuple, Dictionaries, and Set.

PERSONAL PROJECTS

IoT Project — *Face Detection and Recognition using Raspberry-Pi*

UX Research skills, I was able to identify the factors that contribute to the high rate of theft and fraud. I choose to use the Raspberry Pi, Python, and open CV libraries to aid in face detection and identification which shall help to reduce the crime rate.

Fronted-Web — *An e-Commerce website using Html & CSS and JavaScript.*

I Am currently working on an E-commerce website. The website will help users to buy their products online..

Curriculum Vitae

Nyaboke Purity

Software Developer
543 Ndege Road
Nairobi, 00100 Kenya
Age: 21 years
Gender: Female
Phone Number: +254 703 987 323
Email: sassynyabox@gmail.com
Zodiac Sign: Gemini

Personal Statement

A curious mind and the capacity to seize opportunities are highly valued by Purity.
Enjoys working with her classmates to complete various projects because she
values collaboration and seeks to hone her interpersonal skills. She is looking
forward to collaborating with developers to produce clean code so as to launch
quality products.

Skills

- Proficient in developing web applications using **HTML/CSS**, and **JavaScript**.
- Capable of storing data in **GitHub** and hosting websites in Netlify.
- Familiarity with basics in **Python** such as data types and data structure such
  as List, Set, Tuple, and Dictionaries.
- Ability to use **Kotlin** and **Android Studio** to create Mobile Apps.

Education

AkiraChix - codeHive
(February 2023 - Present)
Diploma in Information Technology

<u>Relevant Courses</u>
Frontend Development

- Exceptions and Modules - Handling and maintaining program flow using
  JavaScript
- DOM - Creation, change, and elimination of elements from a document using
  JavaScript

Mobile Development

- Basic knowledge of data types, Arrays, Lists, and Object-Oriented
  Programming(OOP) in Kotlin.
- Capable of creating layouts and recycler views in building mobile apps in
  Android Studio.

Backend Development

- Basic knowledge of Linux, Arithmetic Operations, and Comparison Operations.
- Able to understand data types, List, Tuple, Dictionaries, and Set.

Projects

Breaking bad API
A React-built website. It consumes a third party API from Breaking Bad
documentation(a popular series). Users can filter through all characters of the show.
https://breaking-bad-api-reactapp.netlify.app

Shopping List
Created a shopping application using Python that enabled users to add and remove
items from their cart.
https://github.com/Shamimgardobuya/Shopping2/blob/main/shopping2.py
